

Training Day 1 Report

Date: 23 June 2025

Overview:

The training began with an introduction to Artificial Intelligence and the fundamentals of Python programming. The session provided an overview of AI applications and the importance of Python in AI/ML development.

Topics Covered:

1. Introduction to Artificial Intelligence
2. Applications of AI in real life
3. Introduction to Python programming
4. Python syntax and variables

Details:

We discussed the real-world applications of AI and how it impacts industries such as healthcare, transportation, and finance. The Python section introduced the basic syntax, data types, and how to run Python scripts using online compilers and local environments.
