

Training Day 2 Report

Date: 24 June 2025

Overview:

The second day of training focused on input/output operations in Python and conditional statements, which are foundational for logic building in programs.

Topics Covered:

1. Python input() and print() functions
2. Data conversion (int(), float())
3. if, else, elif conditions
4. Logical operators and nesting conditions

Details:

We practiced taking input from users, printing formatted output, and writing programs to implement decision-making structures using conditionals. Several hands-on exercises were provided to strengthen our understanding.
